It lagged behind, as a department technical report and (to come next) publications, due to the Yellowstone pub and also all the work finalizing the nutrient standards. The latter especially has prevented me from working on the technical report to any extent. My hope is that I will get the dept. technical report done this year, then we can start to spin off publications after that....

Only so much time and energy....

Great! Congratulations!

HQs also asked me if you had published your dose-response study. What is the status of that publication?

Hi Tina;

After we talked, just got an email that Kyle and I's journal article on how we developed numeric nutrients standards for the lower Yellowstone River was essentially accepted for publication in JAWRA. Good news!

Mike
